

Concrete Pump Inspection Checklist

Daily truck checks and follow-up notes | Printable companion | Version 2026-09-23

Use this worksheet with the operating instructions for the exact machine. Have trained personnel complete the checks and record any items needing attention. Keep this record with the machine maintenance history.

Machine / fleet reference:	Brand / model:
Date / site:	Meter reading / unit:
Completed by:	Manual reference / revision:

Record C = checked, A = attention required, N/A = not applicable. Add details on page 2. These entries record observations; operational release remains with the responsible qualified person.

Stage / item	Check using the exact machine instructions	C / A / N/A
Before start-up	Machine reference and correct operating instructions available.	
Before start-up	Guards, emergency controls, warnings and other safety devices.	
Before start-up	Visible condition of boom, supports, hoses, couplings and delivery line.	
Before start-up	Chassis, tyres, lights, visible leakage and specified fluid levels.	
Before start-up	Setup area, supporting ground and permitted support configuration.	
During pumping	New warnings, abnormal noise, movement or leakage.	
During pumping	Delivery-line condition, support stability and changing site conditions.	
After pumping	Cleaning and washout completed using the approved machine procedure.	
After pumping	Damage found, prescribed lubrication, guards restored and defects logged.	

Stop for safety-related defects. Report damaged lines, unavailable safety devices, unstable supports or unexpected movement. Follow the machine shutdown and isolation procedure. Never open a pressurised delivery line.

Defects, follow-up and buying questions

Machine / fleet reference: _____ Date: _____

Item / observation	Action / person responsible	Follow-up date / status

Maintenance and operational decisions

Use the exact model instructions for fluids, wear limits, inspection intervals and repair procedures. Assign maintenance and specialist work to qualified personnel. This worksheet is a daily record, not a structural inspection or a certificate of fitness.

Comparing a used concrete pump truck?

Tell Mechabro the machine reference or preferred brand, required boom reach, intended work and delivery destination. Our team can help you compare available equipment and discuss inspection, configuration and shipping options.
